- 10+ years creating responsive, adaptive, and modular code to suit the needs of any project
- Involved in all parts of product development from product requirements and design to implementation and evangelizing
- Works in tandem with sales, marketing, and customers to create tailored, context-cognizant solutions with an eye for the user at all times
- Excellent at quickly recognizing, triaging, and cataloging issues while meeting and exceeding standards for quality code and documentation

experience

lead software engineer

02/12 - present

acres 4.0
las vegas, nv

- Led engineering team in process of converting existing native iOS apps to react-native hybrid apps
- Led a team of engineers from varying disciplines to create a mobile casino slot dispatch system, allowing clients to better optimize manpower and save time without sacrificing customer service
- Conceptualized, designed, and developed add-on modules to create value and versatility for users
- Managed and maintained JIRA ticketing system and confluence knowledge base, created best-practices of reporting and documentation for colleagues
- Developed rapid app prototypes on-demand for trade shows and product demos

IT manager

11/08 - 01/12

green valley med
las vegas, nv

- Created program to sync data in pharmacy software and ERP software
- Customized an open source ERP package, written in C++, for specific company needs
- Created iPad application for use by company sales force
- Optimized SQL stored procedures and functions

programmer

02/04 - 08/08

microNova systems
wilmington, nc

- Created a program in C++ to handle the creation of cd-rom software packages from a version control database
- Programmed an easy-to-use front-end for a CRM database using C++
- Maintained documentation of source code and assisted in the creation of an in-depth user manual
